

HIGH VOLTAGE BREAKDOWN TESTER (5KV / 30mA)

Insuzo High Voltage Breakdown Tester ensures precise testing of insulation and dielectric strength for transformers, cables, wires, and components.

Ideal for quality control, production, and R&D applications.

Features adjustable voltage and leakage limits with clear digital monitoring.

Optional timer (1–999 sec) enables controlled and repeatable testing.

Designed for safe, easy, and efficient operation in industrial environments.

PRODUCT DATASHEET

SPECIFICATIONS

OUTPUT VOLTAGE (AC)	0.00 - 5.00 kV AC
TEST CURRENT	03.0 - 30.0mA
ACCURACY	± 0.1-0.2 of Reading
POWER REQUIREMENT	230V AC
INDICATIONS	Lamp Indication for 'HT ON' & OFF'
OPTIONAL TIMER	0-999 seconds Digital Timer

High Voltage Test Set of any other output volatage and test current other than the one mentioned above can also be designed.

DC High Voltage Test Sets can also be provided.

AC and DC Combined High Voltage Test Sets can also be provided.

Please send us the specifications you require so that we can have it designed and send the details to you.
